

PRODUCT DATASHEET

Invoiced A/R Intelligence

Reporting & analytics for a complete A/R snapshot and forecast.

Managing A/R starts with measuring it. But as your business grows, so do your unique requirements for understanding what's happening—and what will happen—across the entire invoice-to-cash lifecycle. That's why Invoiced offers powerful reporting on everything finance, treasury and A/R teams need to know about the current state and future of A/R performance.

Pre-Built Reports

Invoiced lets you know everything that's happening at both a summary dashboard level as well as offering dozens of specialized, included reports on overall A/R performance, collections, payments and sales.

Cash Collection Forecasting

With all the data Invoiced gathers on invoices, autopay, payment plans, promises-to-pay and customer payment history, we're able to deliver high accuracy forecasting on when you'll receive payments.

Advanced Reporting

With our optional Advanced Reporting add-on, your team can create and save virtually limitless custom reports based on hundreds of object and field types and even write custom queries to answer your most burning A/R performance questions.

Multi-Entity Reporting

For businesses with multiple entities, subsidiaries or regions, it isn't always easy to understand what's happening at both the full company level AND the individual business unit level. That's why Invoiced offers multi-entity filtering and aggregation options for generating reports.
