

MODULE DATASHEET

# Invoiced NetSuite Integration

## Put A/R on autopilot for NetSuite.

While NetSuite is a top ERP with basic billing capabilities, many businesses need a more comprehensive solution for managing A/R that seamlessly connects and syncs with their core system of record. Invoiced integrates with NetSuite out of the box and extends the value of your ERP investment.

## Key Solution Features & Benefits

### Automated Collections

Speed up collections by adding automation and robust chasing tools to NetSuite invoicing.

### Real-Time Accounting Sync

Automatic two-way sync on customers, invoices, credit notes and payments within NetSuite.

### Integrated Customer Portal

Add a self-service NetSuite customer portal to accept online payments and reduce billing inquiries.

### Easy to Connect

Easily connect to NetSuite and get help from our team on installation and setup.

- Read customers, open invoices, credit notes, and payments from NetSuite
- Write payments received on Invoiced to NetSuite
- Data flows happen in real-time
