

Invoiced Analytics, Reporting, & Forecasting for Accounts Receivable

Measure and monitor your accounts receivable (A/R) performance with the Invoiced platform's comprehensive set of intelligence capabilities. To manage your A/R effectively, you have to be able to measure it. And as your business grows, your unique requirements for understanding what's happening—and what will happen—across the invoice-to-cash lifecycle also evolve. Invoiced A/R software includes a comprehensive collection of advanced analytics, reporting, and forecasting capabilities. Our automated platform provides the tools to stay on top of your A/R performance, no matter how your organization's demands change.

Key features and benefits

With the Invoiced platform's analytics, reporting, and forecasting functionality, your organization can:

- 
Build reports that meet your specific business needs:
 Create and save virtually limitless custom reports with our optional Advanced Reporting add-on, which allows you to base your reports on hundreds of object and field types. Plus, you can write custom queries to answer your most pressing A/R performance questions.
- 
Check your dashboard or your specialized reports to find out what's happening:
 Find out what you need to know by checking your analytics dashboard or viewing specialized reports on your collections, payments, sales, overall A/R performance, and more.
- 
Know when you can expect payment:
 Predict when your organization will receive payments with a high degree of accuracy. Our cash collection forecasting is based on invoice, autopay, payment plan, promise-to-pay, and payment history data.
- 
Get the big picture *and* the smaller picture:
 Understand what's happening in your organization—at both the larger company level and the individual business unit level—with our multi-entity filtering and aggregation options for report generation.
- 
Use pre-built templates or create custom reports:
 Choose from dozens of pre-built templates to create powerful, real-time reports or configure customized reporting.

"We use invoiced to accept payment from our customers who are both local and out of state. Our most significant benefit is improved customer experience. Invoiced allows us to collect small to large payments from our customers efficiently and conveniently."
