**Invoiced** powered by **flywire**

# Invoiced Microsoft Dynamics 365 Business Central Integration

Invoiced offers an out-of-the-box integration with Microsoft Dynamics 365 Business Central, enhancing billing capabilities and streamlining accounts receivable processes. This integration facilitates automated invoicing, real-time data synchronization, and improved financial visibility.

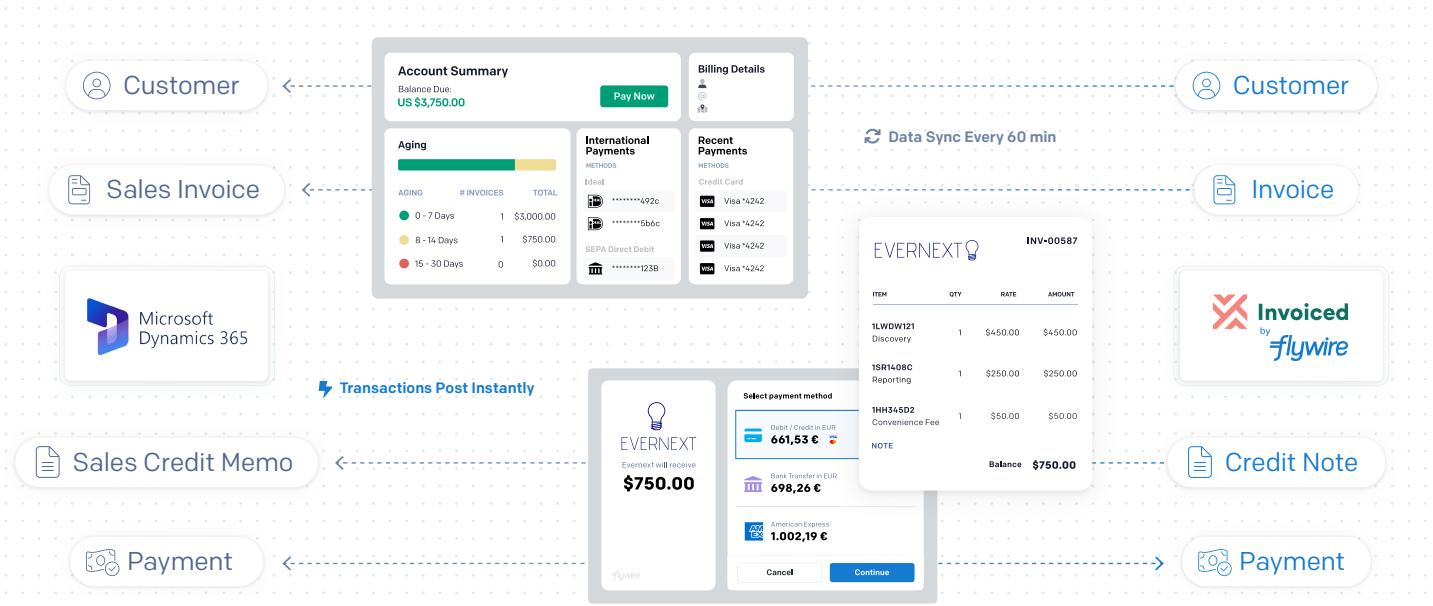

# Key Features

### ✓ Bi-Directional Sync

Data flows seamlessly between Invoiced and Business Central. New data from Business Central syncs to Invoiced hourly, while transactions from Invoiced post to Business Central in real time.

### ✓ Automated Workflows

Set up custom invoice generation, delivery, and collections workflows, reducing manual intervention and accelerating the invoice-to-cash cycle.

### ✓ AI-Powered Cash Application

Leverage AI to match payments to invoices accurately, streamlining reconciliation processes and minimizing errors.

### ✓ Initial Data Sync

Option to perform a one-time sync of historical data (up to one year per sync) from Business Central to Invoiced, ensuring continuity and completeness of financial records.

### ✓ Smart Chasing

Automate payment reminders and follow-ups with customizable schedules and communication channels, improving collection rates and reducing Days Sales Outstanding (DSO).

### ✓ Real-Time Analytics

Access dashboards and reports for insights into outstanding invoices, payment statuses, and cash flow projections, aiding in informed decision-making.

# Benefits

### Efficiency Gains

Automated processes reduce manual workload, allowing staff to focus on strategic tasks.

### Improved Cash Flow

Faster invoicing and collections accelerate revenue realization.

### Enhanced Accuracy

Real-time data synchronization minimizes errors and discrepancies.

### Scalability

The integration supports growing transaction volumes without compromising performance.

★★★★★

## "Streamlining A/R for us!"

"Invoiced is a well-thought-out interface that is incredibly intuitive and easy for our customers to use. We can access anything we need from our CRM and data repository through the API. IT is complete and robust. Our user portal is easy to use. The few times we have needed customer support, it has been awesome. They have live chat in the product and the response is very quick!"
