

Invoiced Sage Intacct Integration

Integrate your Sage Intacct software with the Invoiced platform to gain advanced billing and collections capabilities, streamline your workflows, and offer a better customer experience.

Key Features

Two-way sync

Syncs customers, invoices, payments, credit notes, and contacts in both directions.

Sync frequency:

New data from Intacct is pulled into Invoiced **hourly**.

Payments and updates from Invoiced to Intacct post **immediately**.

Convenience fee support

Fees can be posted to Intacct as separate invoices or overpayments, with full dimension tracking.

Historical data import

Initial setup allows syncing up to **1 year** of past invoices and payments; additional syncs can be run for older data.

Dimension and GL account mapping

Supports tagging by location, department, project, and class directly from Invoiced.

Setup via Web Services User

Requires a dedicated Intacct Web Services user with appropriate module permissions.

Benefits

Accurate, Up-to-date Data

Hourly and real-time syncing reduces delays and errors.

Advanced GL Integration

Dimensions ensure proper ledger tracking for every transaction.

Minimized Reconciliation Time

Real-time payment and fee posting keep books aligned.

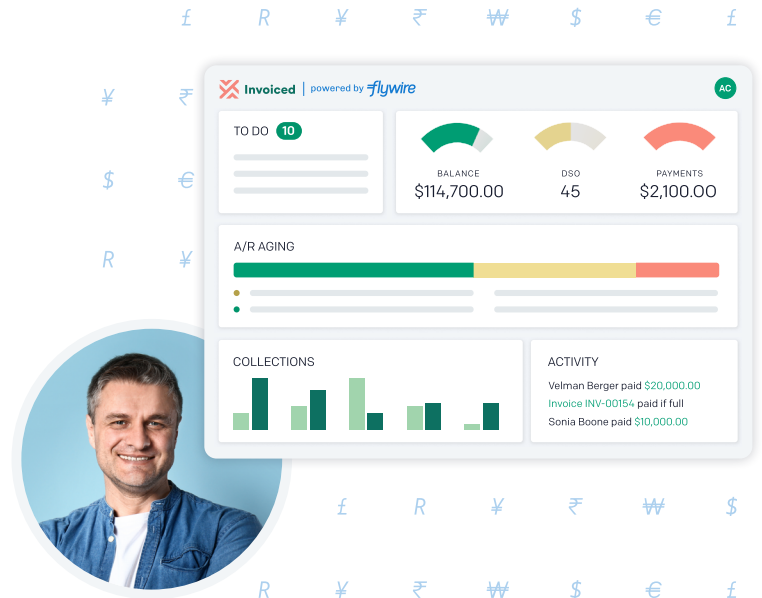

Efficient Onboarding

Historical sync avoids the need for manual data imports.

Next Steps

To find out what automating with Invoiced can do for your business, **schedule a demo** with us now.

"Streamlining A/R for us!"

"Invoiced is a well-thought-out interface that is incredibly intuitive and easy for our customers to use. We can access anything we need from our CRM and data repository through the API. IT is complete and robust. Our user portal is easy to use. The few times we have needed customer support, it has been awesome. They have live chat in the product and the response is very quick!"
